NCCN

Patient and Caregiver Resources

Your best resource in the fight against cancer®

As part of its mission to improve the lives of patients with cancer, the National Comprehensive Cancer Network® (NCCN®) works to develop treatment guidelines and resources to help patients and their caregivers navigate through their experience with cancer and make informed choices.

NCCN takes state-of-the-art cancer treatment protocol used by the world's top doctors and translates it into easy-to-understand information for patients and their caregivers.

NCCN.org/patients is a patient-friendly source for information about cancer and its treatment, from diagnosis to survivorship, and all the stages in between.

NCCN continues to expand its offering of patient resources, including the NCCN Guidelines for Patients®, expert articles, searchable databases, and more.

Understanding Your Diagnosis and Treatment

According to the National Cancer Institute, there are more than 14 million cancer survivors in the United States. A cancer diagnosis brings with it not only the challenges of treatment, but practical and emotional issues as well. NCCN resources assist patients and their caregivers with overcoming the challenges related to cancer.

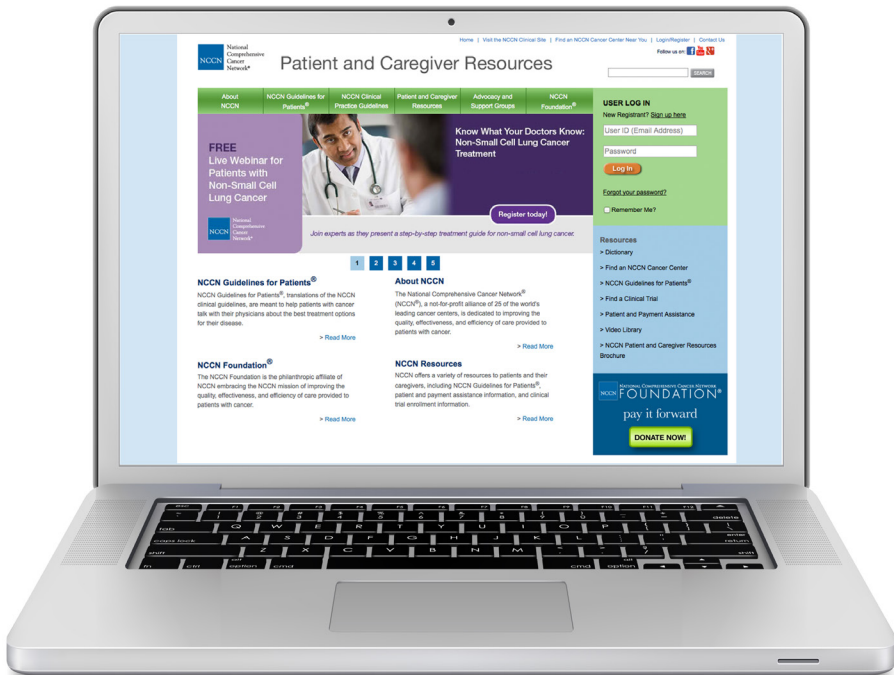

Where to Turn for Support

Patient advocacy groups help patients, their families, and their caregivers navigate the cancer landscape. These groups work to ensure cancer patients receive appropriate and timely care, education, and financial assistance, when needed.

[NCCN.org/patients](https://www.nccn.org/patients) includes a comprehensive Patient Advocacy and Support Groups Directory that includes advocacy organizations devoted to people with cancer and their families. Visitors can search for groups using several different options, including disease type, treatment, and payment assistance.

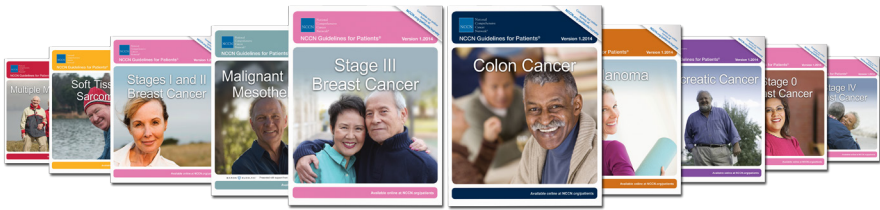

NCCN.org/patients *features:*

- NCCN Guidelines for Patients®
- Comprehensive dictionary of terms from NCCN Guidelines for Patients®
- Up-to-date directory of Patient Advocacy and Support Organizations
- Payment Assistance information
- Database of Actively Enrolling Clinical Trials
- Video Library

Visit **NCCN.org/patients** today and register to receive news and updates about developments in cancer treatment.

NCCN Guidelines for Patients® are available for multiple cancer types

NCCN aims to provide people with cancer and the general public with state-of-the-art cancer treatment information in easy-to-understand language. The NCCN Guidelines for Patients, translations of the NCCN clinical guidelines, are meant to help people with cancer talk with their doctors about the best treatment options for their disease. NCCN also offers summaries of updates as new NCCN Guidelines for Patients are posted.

Visit [NCCN.org/patients](https://www.nccn.org/patients)

to view and download the NCCN Guidelines for Patients.
Print versions available for certain cancer types.

Funding for the NCCN Guidelines for Patients is provided through the NCCN Foundation®.

NCCN Patient and Payment Assistance

The cancer reimbursement landscape presents ever-evolving challenges for patients, doctors, and others who work with patients with cancer. NCCN has the following free resources available for easy access to patient assistance programs.

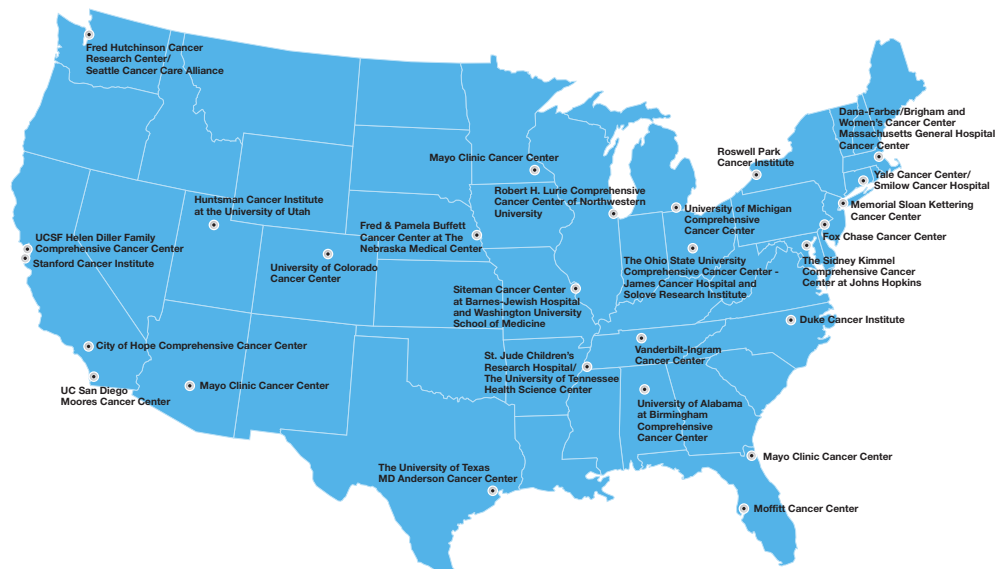

Visit [NCCN.org/reimbursement](https://www.nccn.org/reimbursement) to search for reimbursement programs by cancer type or supportive care indication, drug name, or reimbursement or assistance program name.

The **NCCN Reimbursement Resources App**, available for Apple and Android devices, offers the same benefits on your smartphone or tablet.

NCCN Cancer Centers

NCCN is comprised of leading cancer centers located throughout the United States. World-renowned experts from these NCCN Cancer Centers diagnose and treat patients with a broad spectrum of cancers and are recognized for dealing with complex, aggressive, or rare cancers. NCCN Cancer Centers treat patients across the continuum of cancer care—from screening and diagnosis, through treatment, to palliative care or survivorship.

NCCN Cancer Centers pioneered the concept of the multidisciplinary team approach to patient care and lead the fight against cancer as they integrate programs in patient care, research, and education. Programs at these institutions offer access to expert physicians, superior treatment, and quality and safety initiatives that continuously improve the quality, effectiveness, and efficiency of cancer care.
